How to use

Red and white clamping confirmation lines let you confirm the clamping visually.

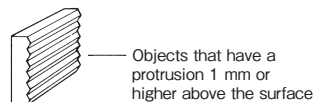

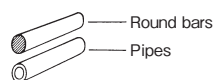

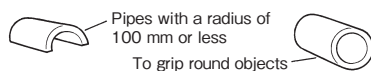

Please always check the clamping state to use the clamp safely.

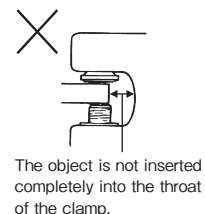

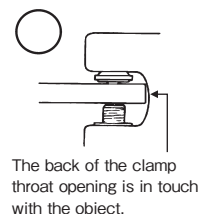

Make sure after the screw has been tightened to the specified torque, that the red line disappears and the white line appears.

Precautions for safety

- Never use clamps if they have been subjected to an impact load.
- Clamps cannot be attached or used in the following places.

- When attaching a clamp to an object, be sure to insert the clamp until the back of the clamp throat opening touches the object to be lifted.

★ Please be sure to read the instruction manual before using the clamps.
